- Huawei Student Developers** – Core Team Member (2024–2025)
- Shipin** – Technical Core Team Member (2026–Present)

Experience

Part-Time Jr. Full Stack Developer, Omedya Bilişim A.Ş. – Ankara May 2025 – Present

- Developed enterprise-scale web applications using Angular and .NET 10; maintained and supported clients' ERP and CRM systems.
- Researched, built, and deployed AI Agents and automation services enabling intelligent task execution and third-party API integration.

Part-Time Jr. Full Stack Developer, ARC Foreign Trade – Ankara Feb 2025 – May 2025

- Designed and delivered corporate websites and custom CRM systems, managing the full UI/UX and frontend-backend development lifecycle.

Intern Full Stack Developer, Tarvina Software Technologies – Ankara Sept 2024 – Dec 2024

- Built UI components and wireframes for client-facing web apps with React and Node.js; participated in Agile daily stand-ups.

Projects

Targiz targiz.com

- Led a 3-person team as Software Lead, shipping a React Native mobile app, Next.js web app, and landing page from scratch with Supabase, Gemini chatbot, RAG system, map, and messaging modules.
- Won 2nd place in two national competitions: OstimTech Project Market and SİBA'25 Project Market.

Poyraz UI – React Component Library ui.poyrazavsever.com

- Published open-source npm package with 50+ accessible components (React 19, Tailwind CSS 4, Radix UI), 40+ token semantic CSS system, dark mode, CLI wizard, ESM + CJS, full TypeScript support.

OhHike CoachOS – AI Sports Operations Platform ohhike.com

- Turborepo monorepo (Next.js, Supabase, Clerk, Gemini AI) with coach dashboard, team tracking, AI Reports, Team Memory RAG, SaaS billing gate, and Dokploy Docker deployment pipelines.

Neta – Open-Source Freelance Management Portal takeneta.com

- Self-hostable freelancer OS (Next.js, Supabase) with project/finance/analytics, AI chat via Vercel AI SDK, Supabase RLS access control, and Poyraz UI as the component layer.

Published npm packages: npmjs.com/~poyrazavsever
